

# THE MOBILE WORKFORCE SOLUTION

# THE MOBILE WORKFORCE SOLUTION

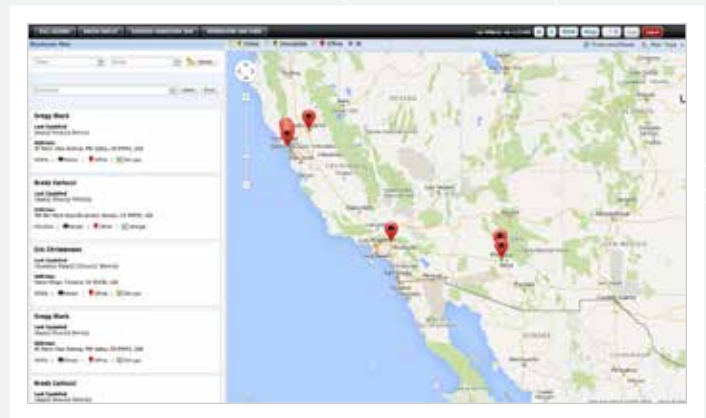

Tackling national installation projects with ease

ETwater's Mobile Workforce Solution solves the many challenges of a nation-wide smart irrigation roll-out. It empowers a national workforce with a mobile platform that manages, guides and records every aspect of each installation.

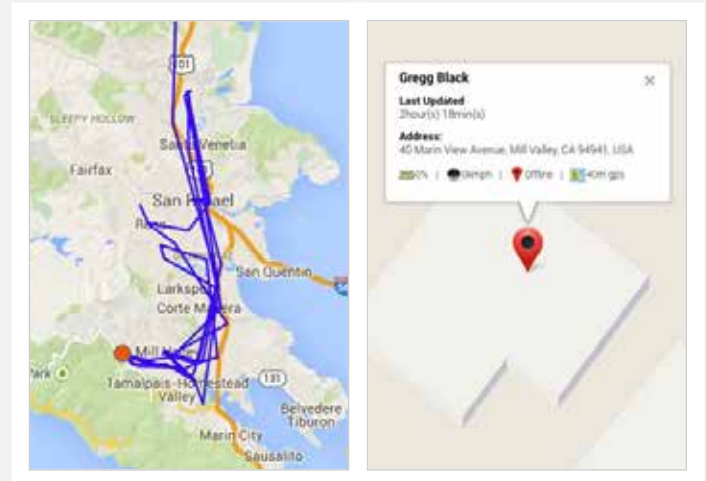

It differs dramatically from conventional installation and service methods because of its transparency and real-time tracking and approval capabilities, enabling much faster dispatch of field personnel for service requests.

It provides an unparalleled window into the progress of a multi-site installation project through its up-to-the-minute status reporting, while simultaneously creating a detailed work history. The unparalleled field-level visibility enables ETwater to better monitor progress, optimize roll-out, remotely fine-tune procedures mid-way deployment, and capture and resolve any issues as they occur.

The results are a much faster deployment, consistent satisfactory results, and incredibly detailed installation reports that surpass the documentation requirements of even the most demanding clients. No other smart irrigation provider's capabilities come even close.

Real-time map view of deployed staff and assets

Route Tracking, Optimization, and locational awareness

Pin Drops for Assets and characteristics

Job dashboard with drill-down reporting

The interface shows a 'Workflow Used To Complete Job' with a list of steps: 1. Start Job, 2. Set arrival time, 3. Set location, 4. Check in, 5. Find existing equipment, 6. Where is the equipment?, and 7. Check equipment location. Each step has a dropdown menu for 'Number Job Steps' and 'Optional' status, along with 'Add New Step', 'Duplicate Step', and 'Delete Step' buttons.

Minute control and flexibility in workflow creation

The interface shows a list of jobs with columns for Job ID, Job Name, Location, Status, and Date/Time. A sidebar on the left lists various job types and categories. The main table includes a 'Photo' column with small image thumbnails for each job entry.

Complete workflow tracking with imaging and annotation

The ETwater Mobile Workforce Solution Provides:

- Customizable workflow and detailed work order creation.
- Extremely detailed and transparent site analysis and survey tools.
- Geo-located asset tracking.
- Real time communications with field personnel.
- Live service recording.
- Simplified and transparent scheduling and milestone tracking.
- Authorization of scheduling and proof of delivery.
- Real time field personal tracking and quality assurance.
- Ability to capture images before, during, and after installation.
- Real-time proof of service delivery including authorization and signature upon completion.
- Custom site reporting and analytics.
